

OSKAR WICHTOWSKI

AI Engineer | Software Engineer | Quality Assurance

+48692847841 @oskar.wichtowski3@gmail.com LinkedIn · Webpage · GitHub Poznań, Poland

KEY ACHIEVEMENTS

AI Pipeline Optimization
Redesigned an AI processing pipeline, reducing expected vendor costs by over 50%

AI System Reliability
Contributed to model evaluation, RAG chunking experiments, and reliability-focused testing practices

EXPERIENCE

07/2026 - Present	Artificial Intelligence Engineer WPP Enterprise Solutions - Building AI-powered e-commerce PoCs, including Shopify-integrated workflows and an LLM-based chat-bot for product discovery and customer-support scenarios. - Developing a recommendation engine PoC for a client, focused on personalized product suggestions, data-driven matching logic, and validating AI-assisted commerce use cases.	
06/2026 - Present	Freelance Software Engineer Freelance Projects - Developing a coupon platform built with React and Symfony, including production-ready features. - Designing CMS solutions, administration panels, and promotional components. - Maintaining and extending APIs, databases, and Kubernetes-based production infrastructure. - Analyzing requirements and delivering changes end to end. - Debugging issues and improving the stability of the production environment.	
09/2025 - 06/2026	Artificial Intelligence Engineer VML Enterprise Solutions - Led the redesign and delivery of a scientific-paper indexing pipeline for a global biopharmaceutical client, covering architecture, infrastructure, implementation, and release under a tight deadline while cutting expected vendor costs by over 50%. - Designed and delivered production-grade LLM services and RAG systems for enterprise clients, including a global bio-pharmaceutical company. - Built and managed scalable AI infrastructure and deployment pipelines using infrastructure as code. - Drove adoption of modern AI tooling, API testing, and GenAI coding standards across the team. - Contributed hands-on to newly delivered AI services from design through production.	
01/2024 - 08/2025	Quality Assurance Engineer Wunderman Thompson Commerce & Technology - Acted as the AI Engineer's primary partner, contributing to AI-driven features and client-facing solutions. - Introduced a multistage fraud detection validation process informed by data analysis, QA findings, and risk assessments. - Pioneered API testing practices for AI systems and helped establish early team standards - Worked cross-functionally with frontend and backend engineers, actively supporting delivery and quality. - Contributed to QA processes that enabled near-daily production deployments for an AEM platform, supported by automation checks and scalable testing practices.	
04/2022 - 01/2024	Intern & Junior Quality Assurance Engineer Wunderman Thompson Technology - Managed billable testing tools and delivered accessibility and quality reports for large-scale enterprise clients. - Built CI and testing pipelines, and authored automated and manual tests for complex custom platforms. - Contributed QA improvement ideas for an e-commerce platform, helping refine test coverage and delivery workflows.	
12/2019 - 05/2020	IT Specialist Intern Integrale IT & Speed Up - Performed server maintenance, hardware diagnostics, and inventory checks for company infrastructure. - Supported server servicing and equipment verification at PCSS Poznań. - Assisted with troubleshooting, documentation, and basic infrastructure support tasks.	

AI & ENGINEERING SKILLS

LLM Application Engineering	RAG	AI Reliability	Object Detection	Python	TypeScript	MLOps	FastAPI	Pydantic		
PostgreSQL	MongoDB	Redis	AWS	GCP	Pulumi	Docker	Playwright	CI/CD	GitHub Actions	Langfuse
MLflow	CloudWatch	Grafana	AI System Testing	GenAI Coding Workflows	Agentic Workflows	Model Evaluation				

EDUCATION

09/2022 - 06/2026	B.Sc. in Computer Science Collegium Da Vinci	
2018 - 2022	IT Technician Degree Zespół Szkół Łączności w Poznaniu
